

## CLAIM AMENDMENTS

1-10. (Canceled)

11. (New) A motor vehicle body comprising a strut arrangement for supporting a component of a fore-part structure on a crossmember running underneath a windshield, the strut arrangement comprising a strut, via which a spring strut dome of the fore-part structure is supported on the crossmember, the strut of the strut arrangement having at least one fastening point of a wiper drive of a windshield wiping system wherein the wiper drive is arranged on an underside of the strut, and a drive shaft of the wiper drive passes through the strut.

12. (New) The motor vehicle body as claimed in claim 11, wherein the wiper drive is fastened to an end region, facing the crossmember, of the strut.

13. (New) The motor vehicle body as claimed in claim 11, wherein the strut is fastened to an inside, facing the vehicle center, of the spring strut dome.

14. (New) The motor vehicle body as claimed in claim 11, wherein a bearing point of a windshield wiper of the windshield wiping system is held by the strut arrangement.

15. (New) The motor vehicle body as claimed in claim 14, wherein the bearing point of the windshield wiper is carried by a holding arm which projects laterally from the strut.

16. (New) The motor vehicle body as claimed in claim 11, wherein the strut is supported on the spring strut dome and on the crossmember via a damping element.

17. (New) The motor vehicle body as claimed in claim 11, wherein the wiper drive is fastened to the strut via a damping element.
